DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 13-21 rejected under 35 U.S.C. 103(a) as being unpatentable over Allman (U.S. 5,645,736).

In regard to claims 13-16, 18 and 21, Allman discloses a semiconductor manufacturing method wherein a layer is polished with a solution comprising abrasive particles (col. 4, lines 17-37) and maleic acid, acrylic or methacrylic acids, which reads on Applicant's "anionic polyelectrolyte".

Allman does not disclose that this solution is used to polish specifically silicon dioxide over silicon nitride.

Allman, however, discloses that "the present compositions can be used to polish or planarize the complex composite surfaces of semiconductor wafers".

It is the Examiner's position that it would have been obvious to one of ordinary skill in the art at the time of the invention to modify Allman by utilizing his polishing composition to specifically polish a silicon dioxide layer, because Allman himself provides the motivation to try the composition on different layers of semiconductor wafers.

In regard to claim 17, it is the Examiner's position that the variation of process parameters such as the concentration of a component would have been obvious to one of ordinary skill in the art, with the purpose of establishing the optimum process conditions.

Art Unit: 1765

In regard to claims 19-20, the use of the claimed components would have been obvious to one of ordinary skill in the art, as these are well known in the art.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vanessa Perez-Ramos whose telephone number is 703-306-5510. The examiner can normally be reached on Mon-Thurs 7:00am-5:30pm.
